

AESTHETIC ADVANTAGE

NEW YORK • PALM BEACH • LONDON

LIVE

HANDS-ON AESTHETIC CONTINUUM

COURSE DESCRIPTION

Our 4-day program is spread over two weekends with a focus on comprehensive aesthetic and restorative dentistry. Through our lecture series, participating doctors are able to listen to lectures on step-by-step prep techniques, smile design principles, impression and cementation techniques, patient management, treatment planning, material selection and lab communication for a more predictable result, and more. On our first clinic day, participants may bring a patient and prep a live case guided by their instructor or participate without a patient and observe over the shoulder 10-15 cases being prepped and temporized .

One month later, participants will return, and through our lecture series, listen to lectures on cementation, occlusion, advanced cases, and marketing. The following day they will seat their cases in clinic guided by their instructor. Participants who chose to observe will watch over the shoulder cases being inserted. It has been proven that the graduates of our long-running aesthetic/restorative programs have seen their practices grow and flourish even in these challenging economic times. Let us infuse your practice with a new philosophy and fine-tune your skills to become more confident and more passionate about the practice of aesthetic dentistry, setting yourself apart from others in your community!

CE Credits: 30

Program I - Rosenthal Philosophy and Technique

Our 4-day program is spread over two weekends with a focus on comprehensive aesthetic and restorative dentistry.

Program II - Rosenthal Philosophy and Technique Expanded

This level builds upon the techniques and concepts presented in Level I. Review of smile design principles and philosophy, facial aesthetic design principles for more advanced cases, an introduction to Implant Dentistry in the Aesthetic Zone and live patient prep and insertion in our clinic.

Program III - Masters Level

This level builds upon the concepts and techniques learned in Levels I and II, and will help place you at the pinnacle of your profession. Master the technique and philosophy of smile design. This course will focus on more individual attention and smaller groups—this elite and exclusive group is limited to five participants.

Programs Prerequisites: Please contact Aesthetic Advantage for more information. All cases must be pre-approved by our clinical director.

COURSE DESCRIPTION (Continued)

Program I Observer

Observer Option/Audit:

Observe our Program I course (one weekend or both weekends) without bringing a patient at one half of the Tuition . You will be able to listen to lectures and observe a clinic session of 15 cases being prepped, temporized and seated in our clinic. This option will allow you to see if our course philosophy is right for your practice.

Observer Head Start Option/Audit:

This program has been designed to provide recent dental school graduates throughout the United States an exciting opportunity in continuing education. Participants will be able to audit our level I continuum for a fraction of the cost of our full tuition . You will be able to listen to lectures and observe a clinic session of 15 cases being prepped, temporized and seated in our clinic. It is an affordable way for recent graduating dentists (within two years) to have the opportunity to jump-start their careers and immerse themselves in this exciting and rewarding aspect of dentistry.

CE Credits: 30 for both weekends

CE Credits: 15 for one weekend
